EQUIPMENT SALE

We sell UTV's, power attachments and heavy equipments of most brands like compactor, dozer, excavator, backhoe, loader, motor grader, scraper, water truck, forklifts, man lifts, mechanic truck, trailers and dump trucks. We can also provide most types of new industrial equipment and heavy construction equipments like to customers all around the world.

CONSTRUCTION

Our team of estimators and project engineers use the latest technology for bidding and expediting the project. Agtek software allows us to directly import the CAD, PDF, or TIFF design files, and generate accurate estimated quantities of material and production.

Upon award of a project the 3-D Site Model is exported to Topcon 3-D Machine Control. The Topcon GPS system creates existing and design surfaces, compares the two, determining the cut/fill for layout and staking. The 3-D Site Model is also exported to finishing equipment, equipped with the Topcon Machine Control, and determines the cutting elevation. Hydraulic control and valves then position the blade, increasing production and eliminating the need for restaking.
